

Join us to build the *future of plants*

About Neoplants:

We're an early stage biotech start-up founded by Lionel (Ex Google) and Patrick (PhD Genetic Editing, ENS), working on the first generation of bioengineered plants to fight air pollution. We start with indoor air pollution, which is up to 5 times higher than outdoors and due to a specific type of pollutants called VOCs. We create plants that can effectively remediate these compounds in your home. Our longer term ambition is to leverage our technologies for other large scale applications such as carbon capture and storage for example. We are backed by top tier Silicon Valley and European investors and are currently based in Paris, France.

We are looking for passionate, ambitious, rigorous and talented individuals to supercharge our R&D and join us on our mission: putting nature at the heart of product innovation to drive positive change. We're looking for individuals who are not afraid to take on seemingly impossible challenges, humble enough to recognise when barriers are insurmountable, yet ingenious enough to find workable solutions.

neoplants

We are at the beginning of a thrilling journey; with amazing growth opportunities. Joining us means being part of our [world-class team](#) and having a huge impact on our R&D and the development of our products. You will get to exercise your leadership, critical thinking, project management skills and team spirit by acquiring multiple responsibilities in an ultra fast-moving environment. You will also contribute to the exceptional working environment we are cultivating.

At Neoplants, we aim to rekindle that spark we had in our eyes when we first got into science. If you are as excited as we are about state of the art technologies, exploring uncharted scientific territories, pushing the boundaries of what is conceivable *for good*, if you want to transform the way people think about genetics and work on inspiring deep-tech products that have a real positive impact on the environment and people's lives, join us and help us lead this movement.

Job Description:

Plant *in vitro* Culture Technician (Permanent position; CDI)

We are looking for a highly motivated plant *in vitro* culture technician to join our “Plants & Transformation” team and help us get our most ambitious R&D project to the next level: Transforming and regenerating our enhanced indoor plant. You will need to have good scientific rigour and be comfortable with managing many parallel tasks. You will also need to be meticulous and have very high attention to detail, as from day 1 you will work on a crucial workstream to achieve results within an aggressive timeline. Your work will impact all future Neoplants products, and thus will be instrumental in achieving our long-term vision.

Required:

- Rigour and attention to details
- Scientific curiosity and willingness to learn
- Ability to stay focused on tasks requiring precise hand gestures
- Ability to work autonomously with little or no supervision
- Team spirit, good interpersonal and communication skills
- Proficiency in English

Nice to have:

- Experience in plant *in vitro* culture and transformation
- Experience in basic molecular biology techniques

Other information about the role:

neoplants

- Location: greater Paris area
- Starting date: ASAP
- Compensation: competitive salary
- Perks examples: private insurance, public transportation, 2500€ of lunch cards / year, on-site free fruits and snacks, and super nice people to work with!

Application:

Send your CV, and 2 professional references to join@neoplants.co . Applications are accepted up until the positions are filled. You can expect to join our team as soon as possible.

We get a lot of applications so don't shy away but surprise us ;)
